List of Tables

Part 1: Results by school type – England 2006 examination data

* These tables refer to candidates who fulfil the criteria of Table 3 and whose A-Level
A grades include these specific subjects / subject combinations

Part 2: Results by Local Education Authority (LEA) and school type – England 2006 examination data

** These tables refer to candidates who fulfil the criteria of Table 20 and whose A-Level A grades include these specific subjects / subject combinations

Aims

This report considers the numbers of A-Level candidates in England (2006 examination session) and the numbers achieving three or more A grades (excluding General Studies and Critical Thinking). Data on some exemplar combinations of A-Levels are presented. This gives an indication of how the pool of elite applicants differs for various HE courses. The numbers of candidates achieving three or more A grades (excluding General Studies and Critical Thinking), at least two of which are not on the University of Cambridge list of 'less effective preparation' subjects (see below), are also given. This latter group of candidates constitutes the pool achieving suitable qualifications for applying to the types of academic courses offered by the University of Cambridge. For many courses at elite universities the pool of suitable candidates is further constrained by the requirement of specific subjects and subject combinations. Therefore, within this pool, numbers whose A-Level A grades include some specific subjects and subject combinations are given.

Part 1 of the report presents these numbers categorised by the school type of the candidates. Part 2 of the report presents these numbers categorised by the Local Education Authority (LEA) and school type of the candidates.

Definition of 'Less Effective Preparation' A-levels

The list below details the A-Level subjects that, taken together, are considered to provide 'a less effective preparation' for the academic type of courses offered by the University of Cambridge (http://www.cam.ac.uk/admissions/undergraduate/requirements/). To be a realistic applicant, a student will normally need to offer two traditional academic subjects not on this list. However, these subjects may have obvious relevance to non-academic courses offered by other HE institutions. Note that it is always advisable to check universities' current websites (and those of specific Colleges) for the precise entry requirements of an academic course.

Data and Methods

Data were extracted from the 16+/18+ National Pupil Databases for 2006, for candidates in England who had their 18th birthday in the school year 2005/2006. These databases are compiled for the DFES (now DCSF) from data supplied by all the awarding bodies in England. They contain candidate details and national examination

records for all candidates in England who have their 16th, 17th and 18th birthdays in a particular school year. Records are present only if the candidate has sat an examination in a particular subject, not just attended classes. School type information was obtained from the awarding bodies' NCN (National Centre Number) database of educational establishments. LEA was identified from the National Statistics Postcode Directory.

Data merging and analyses were carried out in SAS Version 9.1. The dataset was restricted to A-Level A grade results and General Studies and Critical Thinking records were then deleted from it. Frequencies were calculated by school type and LEA. Results in any 'less effective preparation' subjects were labelled in the dataset and the number of A grades minus these subjects was calculated for each candidate. The dataset was then restricted to candidates with 3 or more A grades, at least two of which were not on the 'less effective preparation' list. Frequencies were calculated by school type and LEA. Specific subjects were then labelled in this dataset and the frequencies of various subjects and subject combinations were calculated by school type and LEA.

Results

N.B. All results in this report are restricted to A-Level candidates in England who turned 18 in the school year 2005/2006. A very small number of results may be from examinations taken in years prior to 2006 (i.e. if a candidate sat an A-Level examination when they were younger than expected).

Part 1 – Results by school type

Table 1 shows the total number of A-Level candidates in England in 2006 (candidates with at least one A-Level result of any grade in any subject). Numbers and percentages belonging to each school type are presented. **Table 2** shows the number of candidates in England in 2006 who achieved three or more A grades at A-Level (excluding General Studies and Critical Thinking). Numbers and percentages belonging to each school type are presented. **Table 3** shows the number of candidates in England 2006 who achieved three or more A grades at A-Level (excluding General Studies and Critical Thinking), at least two of which were not on the University of Cambridge 'less effective preparation' list. Numbers and percentages belonging to each school type are presented.

Table 1: All A-Level candidates ~ by school type

total	23569	100

N.B. Tables 4 to 15 refer to candidates who fulfil the criteria of Table 3 and whose A-Level A grades include the specific subjects / subject combinations listed. Numbers and percentages belonging to each school type are presented.

<u>Definition of Subjects</u>

The term 'science subjects' refers to Biology, Human Biology, Chemistry and Physics. The term 'maths subjects' refers to Maths, Maths: Statistics, Maths: Pure and Maths: Further. 'Economics / Business Studies' includes both the single subjects and the combined Business Studies and Economics award. A 'language subject' refers to any modern or classical language. 'History' refers to either History or Ancient History.

Table 4: Candidates with Chemistry and two other maths or science subjects ~ by school type

total	1075	100

Part 2 – Results by LEA and school type

The 149 LEAs in the following tables are presented in order of their numeric codes. The geographical locations of the 150 LEAs in England and the Government Office Regions to which they belong are shown in the Appendix. Note that there are no A-Level records present for the Isles of Scilly (LEA 420, South West), which is omitted from the data tables. Blank spaces in the tables indicate that no records were present in the data.

Table 16 shows the numbers of schools of each type in each LEA in England 2006. Schools are present in this table only if they had any A-Level candidates in the examination session in that year (schools will be absent from this table if they only offered alternative qualifications).

Table 17 shows the numbers of all A-Level candidates at each school type in each LEA (candidates with at least one A-Level result of any grade in any subject). **Table 18** shows this same information in terms of the percentages of candidates belonging to each school type within each LEA.

Table 19 shows the number of candidates who achieved three or more A grades at A-Level (excluding General Studies and Critical Thinking). Numbers belonging to each LEA and school type are presented.

Table 20 shows the number of candidates who achieved three or more A grades at A-Level (excluding General Studies and Critical Thinking), at least two of which were not on the University of Cambridge 'less effective preparation' list. Numbers belonging to each LEA and school type are presented. **Table 21** shows the same information but as a percentage of the number of all A-Level candidates in each school type and LEA (i.e. as divided by the numbers in Table 17). Blank spaces in Table 21 indicate that there were no A-Level candidates present in the corresponding cell in Table 17 whereas figures of '0.0' indicate that, although there were A-Level candidates present, none of them achieved the three or more A grades criteria stated above. Percentages in Table 21 should be interpreted with reference to Table 17 as the numbers of A-Level candidates are very small in some cells.

N.B. Tables 22 to 33 refer to candidates who fulfil the criteria of Table 19 and whose A-Level A grades include the specific subjects / subject combinations listed. Numbers belonging to each LEA and school type are presented.

Table 16: Number of schools of each type in each LEA (with any A level results)
