Appendix D: Most popular A level subject combinations for degree subject areas .....	52

## 1. Introduction

In England the principal measure of academic attainment for 18 year-old pre-university learners is the A level, a general qualification in which learners are awarded grades to reflect their attainment in each subject that they have chosen to study.

In recent years, over 80 different subjects have been offered at A level by the three main awarding bodies in England. Learners can decide which and how many of those subjects they wish to study depending on, for example, their career choices, their academic ability, the provision at their school/college or the advice given to them. Students aiming for university typically study three or four subjects at A level.

Choosing A levels however is not straightforward as some subjects might be seen as providing better grounding for university courses than others.

The aim of this statistical research report was, therefore, to investigate the proportions of students who hold each A level subject (or combinations of A level subjects) when applying for a place at university.

In particular, the research focused on:

- the uptake of A level subjects, and combinations of A level subjects, among university applicants and accepted applicants;
- a comparison of the uptake of A level subjects, and combinations of A level subjects, between university applicants, accepted applicants and the whole A level cohort;
- the uptake of A level subjects, and combinations of A level subjects, among accepted applicants
  - by university group,
  - by degree subject at university;
- a comparison of performance in the most popular A level subjects, and in combinations of A level subjects, between accepted applicants and the whole A level cohort;
- the performance in the most popular A level subjects, and in the combinations of A level subjects, among accepted applicants
  - by university mission group,
  - by degree subject at university<sup>1</sup>.

The outcomes of this research may inform the usefulness of specific A level subjects or combinations of A level subjects as currency for university study.

---

<sup>1</sup> Analyses looking at A level performance by degree subject at university have been carried out and are available upon request for each individual subject area. They are not included in this report as they would generate in excess of 30 pages of tables/graphs.

## 2. Description of the data

The main source of data for the analyses carried out in this report was provided by the Universities and Colleges Admissions Service (UCAS<sup>2</sup>) and contains, for all students applying to study at a UK university during the 2010/11 application cycle and who obtained at least one A level, the following information:

- A level subjects studied
- Grades achieved in the A level subjects
- University mission group (accepted applicants only)
- Subject of study at university (accepted applicants only)
- Applicant flag
- Accept flag

The subject of study at university was provided as a list of 180 subject lines (using the JACS<sup>3</sup> system). These relate to the principal subject of the student's qualification aim. The subject of study was aggregated into 25 broad degree subject areas. Appendix A lists the subject lines and degree subject areas used in this research.

For example, a student accepted to study for a degree in mathematics (G100) would be classified in the subject line 'Mathematics' and the subject area 'Mathematical & Computer Science'. Similarly, a student accepted to study for a degree in statistics (G300) would be classified in the subject line 'Statistics' and the subject area 'Mathematical & Computer Science'. The analyses presented in this report were carried out at degree subject area level.

The higher education institutions are considered in groups through which they share ideas and resources regarding issues and procedures in the higher education sector. The groups provided by UCAS for this research are<sup>4</sup>: The Russell Group, The 1994 Group, University Alliance and The Million+ Group. Appendix B shows a description of each group and provides a list of its members. It should be noted that some universities might not have joined any of the groups above and therefore would be classified as Other.

Appendix C contains general information on acceptances for higher education courses in the 2010/11 application cycle by university group and subject group<sup>5</sup>.

Data on the uptake of and performance in A level subjects for the **full** A level cohort in 2011 was obtained from the National Pupil Database (NPD). This database, compiled by the Department for Education, is a longitudinal database for all children in schools in England, linking student characteristics to school and college learning aims and attainment. The NPD holds pupil and school characteristics such as age, gender, ethnicity, level of deprivation, attendance and exclusions, matched to pupil level attainment data (Key Stage 2 to Key Stage 5 assessments and other external examinations).

---

<sup>2</sup> UCAS cannot accept responsibility for any inferences or conclusions derived from the data by third parties.

<sup>3</sup> The Joint Academic Classification of Subjects (JACS) system is used by the Higher Education Statistics Agency (HESA) and the Universities and Colleges Admissions Service (UCAS) to classify academic subjects, especially for undergraduate degrees.

<sup>4</sup> UCAS did not provide data at individual institution level due to confidentiality issues.

<sup>5</sup> Source: [http://www.ucas.com/about\\_us/stat\\_services/stats\\_online/data\\_tables/datasummary](http://www.ucas.com/about_us/stat_services/stats_online/data_tables/datasummary).

In the following sections of this report, descriptive statistics provide information on the destinations (universities and degree subject areas) of students with each A level subject and with the most popular combinations of A level subjects.

### 3. Results

#### 3.1 Individual A level subjects

##### 3.1.1 Uptake

The tables presented in this section of the report show which individual A level subjects were most commonly held by undergraduates in UK higher education institutions in the academic year 2011/12.

As stated in Sections 1 and 2, the uptake of A level subjects is investigated in five university mission groups and in 25 degree subject areas. In order to simplify the presentation of the results from those analyses, degree subjects areas were grouped in five broad groups, as shown in Table 1, and five separate tables/figures were provided.

Table 1: Classification of degree subject area

<b><i>Degree subject group</i></b>	<b><i>Degree subject area</i></b>
Group 1	Subjects allied to Medicine Biological Sciences Medicine & Dentistry Veterinary Science, Agriculture & related subjects
Group 2	Architecture, Building and Planning Engineering Mathematics & Computer Science Physical Sciences Technologies
Group 3	Business & Administrative Studies Mass Communications & Documentation Creative Arts & Design Education Social Studies
Group 4	European Languages, Literature & related subjects History & Philosophical studies Law Linguistics, Classics & related subjects Non-European Languages & related subjects
Group 5	Combined Arts Combined Sciences Combined Social Sciences Sciences combined with social sciences or arts Social sciences combined with arts General, other combined & unknown

Some of the tables in this section display a comparison of the uptake of A level subjects between university applicants, accepted applicants and the whole A level cohort. It should be noted though that some A level subjects featured in the UCAS data and not in the June 2011 extract of the NPD. Some examples of this were Divinity, Hindi, Biblical Hebrew or Islamic Studies, which students applying to university held but did not appear in the NPD. One possible explanation for this is that the coding of the subjects was different in both datasets and, for example, Biblical Hebrew, present in the UCAS data as such, appeared in the NPD under 'Other Classical Languages'.

Table 2 shows the uptake of individual A level subjects among university applicants in the 2010/11 application cycle and it compares that to the uptake of these subjects by the whole A level cohort in 2011. All A level subjects present in the UCAS data were included in the table and were ordered alphabetically. Thus, Accounting, the subject presented first, was taken by 1.5% of the university applicants in the 2010/11 admissions cycle. This compares with Accounting being taken by 1.4% of the accepted applicants for undergraduate courses and 0.9% of the A level cohort in 2011.

The most popular subject among university applicants was Mathematics (around 30% of the accepted applicants held an A level in this subject), followed by Biology, History, Chemistry and English Literature. It should be noted that the order of the subjects by their popularity was fairly similar in all three groups of students.

The percentages of students holding STEM (Science, Technology, Engineering and Mathematics) subjects at A level was higher among accepted applicants and university applicants in general than among all A level students. This pattern was also similar in most humanities subjects but reversed in subjects such as Art & Design, Music, and Design & Technology.

The uptake of individual A level subjects (as above) is presented, broken down by degree subject and university mission group in Table 3 and Tables 4(a) to 4(e), respectively.

Table 3 shows, for example, that Mathematics was taken by 50.9% of the accepted applicants to Russell Group universities, 43.3% of the accepted applicants to universities in the 1994 Group, and 20.9% and 15.7% of the accepted applicants to universities in the University Alliance and the Million+ groups, respectively.

Table 3 also shows that students accepted to Russell Group and 1994 Group universities held in higher proportions A levels in other STEM subjects (e.g. Biology, Chemistry, Physics, Further Mathematics) and in foreign languages (e.g. French, German, Spanish) than students accepted to universities in the University Alliance or the Million+ Group. There was also variation in the uptake between university groups of more applied subjects (e.g. Design & Technology, Art & Design, Business Studies, ICT, Media Studies) or humanities (e.g. Psychology, Sociology). However, higher proportions of students in the University Alliance or the Million+ Group universities held A levels in those subjects than students in universities of the Russell Group and the 1994 Group.

Tables 4(a) to 4(e), presenting the uptake of individual A level subjects by degree subject, show, for example, that Mathematics was taken by 68.2% of the candidates accepted to pursue a degree in 'Mathematics & Computer Science', by 33.2% of the candidates accepted to 'Subjects allied to Medicine' degrees and by only 18.2% of the candidates accepted to study 'European Languages, Literature & related subjects'.

### **3.1.2 Performance**

This section of the report focuses on performance in the most popular A level subjects among university applicants overall and broken down by university mission group.

Tables 5 and 6 show the percentages of students achieving particular grades (A\* and at least grades A, B and C) in each A level subject, as a percentage of those taking the A level subject. Only A level subjects with an overall uptake level of more than 1% were included in the analyses. Subjects were ordered by overall uptake (highest first).

In particular, Table 5 shows that top grades were more frequent among accepted applicants than among rejected applicants. For example, among the accepted applicants for undergraduate courses with an A level in Mathematics, 20.7% had an A\* and 51.6% had at least grade A. This compares with 14.3% and 36.4% among rejected applicants.

Tables 7 to 10 show, respectively, the percentages achieving grade A\*, at least grade A, at least grade B, and at least grade C in each A level subject, by university mission group. As above, only A level subjects with an overall uptake level of more than 1% were included in these tables.

As an example, Table 8 shows that there were more candidates with at least grade A in A level Mathematics in universities of the Russell Group and 1994 Group (79.8% and 65.9%, respectively) than in universities in any of the other mission groups (13.2% in universities of the University Alliance and 7.2% in universities of the Million+ Group).

Table 5: Percentages of students achieving *grade A\** and *at least grade A* in each A level subject

### 3.2 A level facilitating subjects

A level subject choices can have an important role in determining the university courses and the universities open to students. Some university courses require a specific A level subject (or combinations of A level subjects) and others do not. However, there are some A level subjects that are required more often than others. These subjects are referred to as facilitating subjects (Russell Group, 2012<sup>7</sup>).

Subjects that can be viewed as facilitating subjects are:

- Biology
- Chemistry
- Physics
- Mathematics
- Further Mathematics
- English Literature
- History
- Geography
- Languages (Classical and Modern)<sup>8</sup>

The Russell Group recommends that students take at least two facilitating subjects at A level in order to keep most options for subject choice open.

Schools and colleges offer students a range of A level subjects (as listed, for example, in Table 2) but, unlike the facilitating subjects, they are unlikely to be required for any particular degree course and so choosing them does not increase students' options at university.

This section of the report focuses on facilitating subjects only, collating some results on this group of subjects from the previous tables.

---

<sup>7</sup> Russell Group (2012). *Informed choices: A Russell Group Guide to make decisions about post-16 education*. The Russell Group, London.

<sup>8</sup> Languages (classical and modern) included in this section of the report are French, German, Spanish, Latin and Classical Greek.

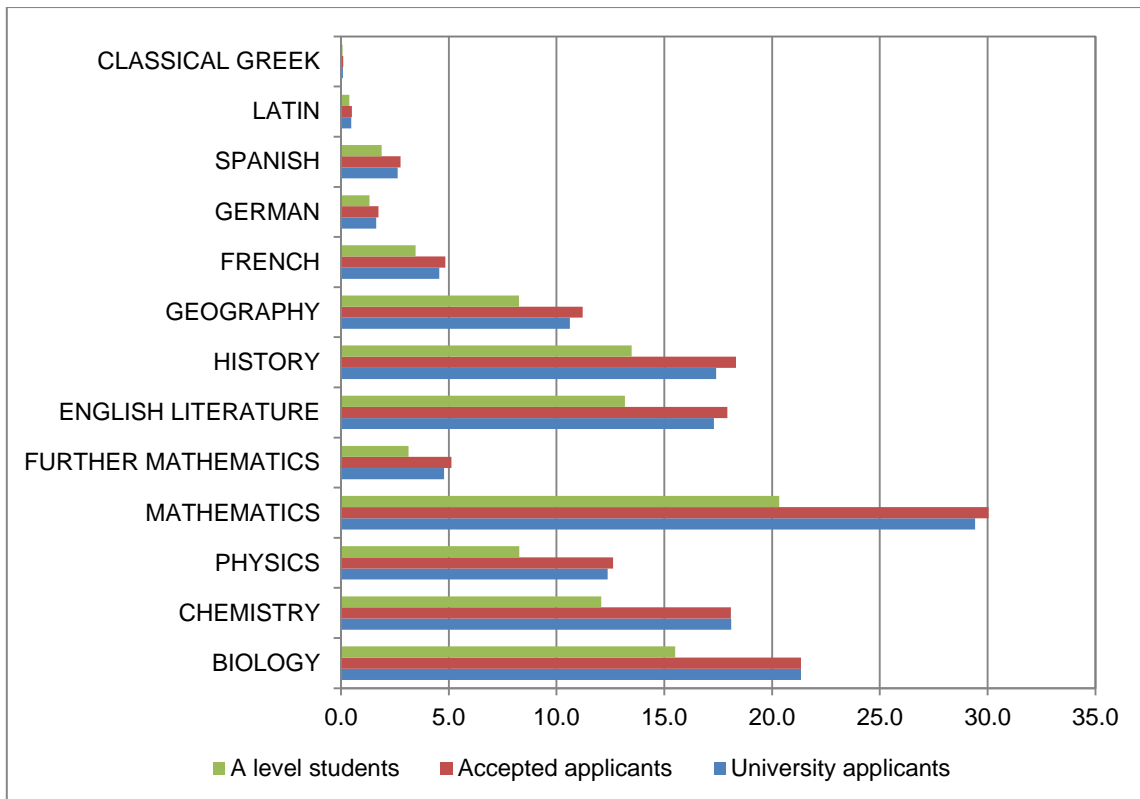

Figure 1: Uptake of A level facilitating subjects

Figure 2: Uptake of A level facilitating subjects, by university mission group (accepted applicants)

Figure 3: A level facilitating subjects ~ percentages achieving at least a grade A in each subject<sup>9</sup>

Figure 4: A level facilitating subjects ~ percentages achieving at least a grade B in each subject

<sup>9</sup> Classical Greek and Latin were not included in the performance figures, as the overall uptake was less than 1%.

Figure 5: A level facilitating subjects ~ percentages achieving at least a grade C in each subject

### 3.3 Combinations of A level subjects

#### 3.3.1 Uptake

The tables presented in this section of the report show which combinations of A level subjects were most commonly held by undergraduates in UK higher education institutions.

Table 11 shows the number of A level subjects held by students. 63% of the A level cohort had three or more A levels, but this proportion was markedly higher among applicants to university (77%) and those who were accepted onto a course (80%). Note that some students may have held other qualifications in addition to A levels, such as BTEC, OCR National, or Extended Project qualifications. This was likely to be the case for students who held only one A level, for example.

Table 11: Number of A level subjects taken

<b>Number of subjects</b>	<b>Percentage of</b>			<b>Acceptance rate (%)</b>
	<b>A level students (N = 291611)</b>	<b>University applicants (N = 304867)</b>	<b>Accepted applicants (N = 252126)</b>	
1	15.5	8.4	7.2	70.3
2	21.8	14.9	13.3	73.7
3	53.1	64.3	66.5	85.5
4	8.7	11.2	12.0	88.0
5+	0.8	1.1	1.1	84.4

Table 12 shows the number of facilitating subjects (as defined by the Russell Group and discussed in Section 3.2) held by students. The Russell Group recommends that students take at least two facilitating subjects at A level in order to keep most options for subject choice open (although they caution that some degrees, such as Music or Art, will require non-facilitating subjects to be chosen at A level). The majority of students, including those accepted at university, held A levels in fewer than two facilitating subjects.

Table 12: Number of facilitating A level subjects taken

<b>Number of facilitating subjects</b>	<b>Percentage of</b>			<b>Acceptance rate (%)</b>
	<b>A level students (N = 291611)</b>	<b>University applicants (N = 304867)</b>	<b>Accepted applicants (N = 252126)</b>	
0	32.8	27.9	26.4	78.2
1	29.2	28.5	28.5	82.7
2	20.6	22.7	23.6	85.8
3	14.2	16.7	17.2	85.2
4	3.0	3.9	4.0	86.1
5+	0.2	0.3	0.3	85.2

Table 13 breaks down the number of facilitating subjects held by university mission group. There is considerable variation across the groups, with students attending Russell Group universities holding the highest number of facilitating subjects (2.3 on average) and those attending Million+ Group institutions the lowest (0.9).

Table 13: Number of facilitating A level subjects taken, by university mission group

Number of facilitating subjects	Percentage of students at				
	Russell Group (N = 61514)	1994 Group (N = 32340)	University Alliance (N = 63027)	Million+ Group (N = 44226)	Other (N = 51019)
0	6.9	10.6	33.6	44.0	35.7
1	18.9	24.9	33.3	32.8	32.6
2	29.0	31.7	22.0	16.5	19.9
3	32.9	26.1	10.4	6.4	10.6
4	11.4	6.3	0.7	0.3	1.2
5+	0.9	0.3	0.0	0.0	0.0

Table 14 shows the most popular 20 combinations of A level subjects held by applicants to university, accepted applicants, and the whole A level cohort. The data has been restricted to students who have taken at least three A levels, excluding General Studies. Notably the combinations in the list were the same for all three groups of students, although the ordering varied.

The list is dominated by combinations of science subjects, with Biology, Chemistry and Mathematics being by far the most popular combination. The most common combination consisting of humanities subjects was English Literature, History and Psychology. Although as Table 2 showed, Chemistry and History were taken by approximately the same number of university applicants, Chemistry featured in nine of the top 20 combinations, whereas History was only in five. The reason is likely to be because of the variety of humanities subjects commonly taken at A level, compared to the relatively small number of science subjects.

The proportion of applicants that were accepted onto a course is also shown in Table 14. There is considerable variation in this proportion between combinations, compared to the overall average for all applicants of 85.8%. Two combinations in the list have particularly low acceptance rates: Biology, Chemistry and Physics; and Biology, Chemistry, Mathematics and Physics (with rates of 76.8% and 76.7% respectively). The dataset does not contain details of intended subject of study for unsuccessful applicants, but Wilde and Hoelscher (2007)<sup>10</sup> found that applicants intending to follow courses in Medicine & Dentistry, and Subjects allied to Medicine were over-represented among non-placed applicants over the period 2003–6. Given the subject combinations involved it seems likely that the competitive nature of these courses is the reason for the relatively low acceptance rates.

The acceptance rate for Chemistry, Further Mathematics, Mathematics and Physics (90.6%) was higher than the rate for the same combination without Further Mathematics (84.1%). However, this could be due to other characteristics (such as relative academic ability) of students who chose to study Further Mathematics in addition, or whose schools/colleges offered it.

<sup>10</sup> Wilde, S. & Hoelscher, M. (2007). *Missed opportunities: non-placed applicants (NPAs) in the UCAS data*. Cheltenham: UCAS.

Table 14: Top 20 combinations of A level subjects

<b>Combination of A level subjects</b>	<b>A level students</b>		<b>University applicants</b>		<b>Accepted applicants</b>		<b>Acceptance rate (%)</b>

Tables 15 to 19 show the most popular A level subject combinations among students attending universities in different mission groups (restricted to students who have taken at least three A levels, excluding General Studies). The ranking and percentage across all accepted applicants (again restricted to students with at least three A levels, excluding General Studies) is also shown for comparison.

While the top two A level subject combinations overall were strongly represented in each of the university groups, there were some more unusual combinations, particularly in the Million+ Group (Law, Psychology and Sociology) and in the Russell Group (Economics, Mathematics, Further Mathematics and Physics) universities.

Table 15: Most popular A level combinations for Russell Group students

9	ART & DESIGN+ENGLISH LITERATURE+HISTORY	0.5	17	0.4
10	ENGLISH LITERATURE+GOVERNMENT & POLITICS+HISTORY	0.5	9	0.6

Table 20 shows the most popular A level combinations among applicants (with at least three A levels excluding General Studies) who were not accepted onto a course at university, with the ranking and percentage across accepted applicants shown for comparison. As also seen in Table 14, students with Biology, Chemistry and Physics were particularly over-represented which may be due to the competitive nature of admissions onto courses in Medicine & Dentistry, and Subjects allied to Medicine.

Table 20: Most popular A level combinations among non-accepted applicants

<b>Rank</b>	<b>Combination of A level subjects</b>	<b>%</b>	<b>Overall rank (accepted applicants)</b>	<b>Overall % (accepted applicants)</b>
1	BIOLOGY+CHEMISTRY+MATHEMATICS	6.8	1	4.7
2	CHEMISTRY+MATHEMATICS+PHYSICS	2.4	2	2.1
3	BIOLOGY+CHEMISTRY+MATHEMATICS+PHYSICS	2.0	6	1.0

8	BIOLOGY+CHEMISTRY+GEOGRAPHY	0.7	8	0.7
9	BIOLOGY+CHEMISTRY+HISTORY	0.7	14	0.5
10	ECONOMICS+MATHEMATICS+PHYSICS	0.7	15	0.5

Appendix D shows tables of popular combinations by university subject area.

### 3.3.2 Performance

Table 21 shows the cumulative distribution of A level grades held by applicants to university, accepted applicants, and the whole A level cohort. This analysis is restricted to students holding more than three A levels (excluding General Studies). For clarity and brevity, A\* grades are represented as '\*' in this table. The grades have been compared on an individual basis, so higher grades in one A level do not compensate for lower grades in another; for example, \*\*C is not classed as ABB or above. Only the best three grades held by each student have been used for comparison.

The distributions were similar between the three groups, but the highest grade combinations (for example \*AA and above) were more frequent among accepted applicants than all applicants, and also more frequent among university applicants than among the whole A level cohort.

Table 21: Cumulative distribution of A level grades

<b>Grade combination (at least)</b>	<b>A level students (%)</b>	<b>University applicants (%)</b>	<b>Accepted applicants (%)</b>
***	3.0	3.3	3.4
**A	7.0	7.5	7.8
*AA	13.1	13.8	14.5
AAA	18.2	19.2	20.2
AAB	29.2	30.5	32.3
ABB	38.4	39.8	42.2
BBB	43.1	44.7	47.2
BBC	58.3	60.1	63.0
BCC	66.8	68.7	71.6
CCC	69.8	71.7	74.6
CCD	83.9	85.5	87.9
CDD	88.9	90.2	92.0
DDD	90.0	91.1	92.8
DDE	98.1	98.5	99.0
DEE	99.8	99.8	99.9
EEE	100.0	100.0	100.0

Table 22 shows the percentage of candidates with A level grades equal to or exceeding two thresholds (ABB and AAB) broken down by university mission group. Approximately a third of applicants gained ABB or above, and a quarter gained AAB or above. However, there is wide variation in these measures across university groups, with around two thirds of Russell Group students holding AAB or above, but only 3% of Million+ Group students.

Table 22: Percentage of applicants gaining ABB, AAB or above, by university mission group

<i>University mission group</i>	<i>% ABB+</i>	<i>% AAB+</i>
Russell Group	84.3	70.7
1994 Group	69.8	52.3
University Alliance	12.2	5.6
Million+ Group	5.9	2.9
Other	18.9	11.9
<b>All accepted applicants</b>	42.2	32.3
Non-placed applicants	25.8	19.7
<b>All applicants</b>	39.8	30.5
<b>All A level students</b>	38.4	29.2

Figure 6 shows the distribution of the average A level grade<sup>11</sup> by university mission group among accepted students. There is a clear gulf between the grade distributions of students attending universities in the Russell and 1994 Groups and the other university groups.

<sup>11</sup> The average A level grade for a student has been calculated under the assumption that the grade scale is linear, such that the average of ABC is B. This assumption also underlies the UCAS tariff system.

Figure 6: Average A level grade, by university mission group

## Appendix A: University subjects and degree subject areas

As mentioned in the report, the subject of study at university was provided as a full list of 180 subject lines (using the JACS system). These relate to the principal subject of the student's qualification aim. The subject of study can be aggregated into 25 broad subject areas. The table below presents the subject lines and the degree subject areas used in this research.

<b><i>Degree subject area</i></b>	<b><i>Subject line</i></b>
<b>Medicine &amp; dentistry</b>	(A0) Broadly-based programmes within medicine & dentistry (A1) Pre-clinical medicine (A2) Pre-clinical dentistry (A3) Clinical medicine (A4) Clinical dentistry (A9) Others in medicine & dentistry
<b>Subjects allied to medicine</b>	(B0) Broadly-based programmes within subjects allied to medicine (B1) Anatomy, physiology & pathology (B2) Pharmacology, toxicology & pharmacy (B3) Complementary medicine (B4) Nutrition (B5) Ophthalmics (B6) Aural & oral sciences (B7) Nursing (B8) Medical technology (B9) Others in subjects allied to medicine
<b>Biological sciences</b>	(C0) Broadly-based programmes within biological sciences (C1) Biology (C2) Botany (C3) Zoology (C4) Genetics (C5) Microbiology (C6) Sports science (C7) Molecular biology, biophysics & biochemistry (C8) Psychology (C9) Others in biological sciences
<b>Veterinary science, agriculture &amp; related subjects</b>	(D0) Broadly-based programmes within agriculture & related subjects (D1) Pre-clinical veterinary medicine (D2) Clinical veterinary medicine & dentistry (D3) Animal science (D4) Agriculture (D5) Forestry (D6) Food & beverage studies (D7) Agricultural sciences (D9) Others in veterinary sciences, agriculture & related subjects
<b>Physical sciences</b>	(F0) Broadly-based programmes within physical sciences (F1) Chemistry (F2) Materials science (F3) Physics (F4) Forensic & archaeological science (F5) Astronomy (F6) Geology (F7) Science of aquatic and terrestrial environments (F8) Physical geographical sciences (F9) Others in physical sciences

<b>Degree subject area</b>	<b>Subject line</b>
<b>Mathematical &amp; computer sciences</b>	(G01) Broadly-based programmes within mathematical sciences (G02) Broadly-based programmes within computer science (G1) Mathematics (G2) Operational research (G3) Statistics (G4) Computer science (G5) Information systems (G6) Software engineering (G7) Artificial intelligence (G91) Others in mathematical sciences (G92) Others in computing science
<b>Engineering</b>	(H0) Broadly-based programmes within engineering & technology (H1) General engineering (H2) Civil engineering (H3) Mechanical engineering (H4) Aerospace engineering (H5) Naval architecture (H6) Electronic & electrical engineering (H7) Production & manufacturing engineering (H8) Chemical, process & energy engineering (H9) Others in engineering
<b>Technologies</b>	(J1) Minerals technology (J2) Metallurgy (J3) Ceramics & glasses (J4) Polymers & textiles (J5) Materials technology not otherwise specified (J6) Maritime technology (J7) Biotechnology (J9) Others in technology (includes Music Technology)
<b>Architecture, building &amp; planning</b>	(K0) Broadly-based programmes within architecture, building & planning (K1) Architecture (K2) Building (K3) Landscape design (K4) Planning (urban, rural & regional) (K9) Others in architecture, building & planning
<b>Social studies</b>	(L0) Broadly-based programmes within social studies (L1) Economics (L2) Politics (L3) Sociology (L4) Social policy (L5) Social work (L6) Anthropology (L7) Human & social geography (L9) Others in social studies
<b>Law</b>	(M0) Broadly-based programmes within law (M1) Law by area (M2) Law by topic (M9) Others in law

<b>Degree subject area</b>	<b>Subject line</b>
<b>Business &amp; administrative studies</b>	(N0) Broadly-based programmes within business & administrative studies (N1) Business studies (N2) Management studies (N3) Finance (N4) Accounting (N5) Marketing (N6) Human resource management (N7) Office skills (N8) Hospitality, leisure, tourism & transport (N9) Others in business & administrative studies
<b>Mass communications &amp; documentation</b>	(P0) Broadly-based programmes within mass communications and documentation (P1) Information services (P2) Publicity studies (P3) Media studies (P4) Publishing (P5) Journalism (P9) Others in mass communications & documentation
<b>Linguistics, classics &amp; related</b>	(Q0) Broadly-based programmes within languages (Q1) Linguistics (Q2) Comparative literary studies (Q3) English studies (Q4) Ancient language studies (Q5) Celtic studies (Q6) Latin studies (Q7) Classical Greek studies (Q8) Classical studies (Q9) Others in linguistics, classics & related subjects
<b>European languages, literature &amp; related</b>	(R1) French studies (R2) German studies (R3) Italian studies (R4) Spanish studies (R5) Portuguese studies (R6) Scandinavian studies (R7) Russian & East European studies (R8) European studies (R9) Others in European languages, literature & related subjects
<b>Non-European languages &amp; related</b>	(T1) Chinese studies (T2) Japanese studies (T3) South Asian studies (T4) Other Asian studies (T5) African studies (T6) Modern Middle Eastern studies (T7) American studies (T8) Australasian studies (T9) Others in Eastern, Asiatic, African, American & Australasian languages, literature & related subjects
<b>Historical &amp; philosophical studies</b>	(V0) Broadly-based programmes within historical and philosophical studies (V1) History by period (V2) History by area (V3) History by topic (V4) Archaeology (V5) Philosophy (V6) Theology & religious studies (V9) Others in historical & philosophical studies

<b>Degree subject area</b>	<b>Subject line</b>
<b>Creative arts &amp; design</b>	(W0) Broadly-based programmes within creative arts & design (W1) Fine art (W2) Design studies (W3) Music (W4) Drama (W5) Dance (W6) Cinematics & photography (W7) Crafts (W8) Imaginative writing (W9) Others in creative arts & design
<b>Education</b>	(X0) Broadly-based programmes within education (X1) Training teachers (X2) Research & study skills in education (X3) Academic studies in education (X9) Others in education
<b>Combined arts</b>	Combs of arts/humanities Combs of languages Combs of languages with arts/humanities
<b>Combined sciences</b>	Y Combs of engineering/tech/building studies Y Combs of engineering/technology Y Combs of med/bio/agric sciences Y Combs of med/bio/agric sciences with physics/math sciences Y Combs of physics/math sciences Y Combs of sciences with engineering/technology
<b>Combined social sciences</b>	Y Combs of social studies/law Y Combs of social studies/law with business
<b>Sciences combined with social sciences or arts</b>	Y Combs of physics/math science with arts/humanities/languages Y Combs of physics/math science with social studies/bus/law Y Combs of science/engineering with arts/humanities/languages Y Combs of science/engineering with social studies/bus/law
<b>Social sciences combined with arts</b>	Y Combs of social studies/bus/law with arts/humanities Y Combs of social studies/bus/law with languages
<b>General, other combined &amp; unknown</b>	Combs of three subjects, or other general courses Other courses not elsewhere classified

## Appendix B: University mission groups

Some universities formed groups through which they share ideas and resources regarding issues and procedures in the higher education sector. For this research, UCAS provided the following university groups: Russell Group, 1994 Group, University Alliance and Million+ Group. Universities that have not joined any of these groups were included in a separate group, labelled as Other.

In this Appendix, a description taken from statements provided on their websites and a list of members of each group is provided<sup>12</sup>.

### The Russell Group (<http://www.russellgroup.ac.uk>)

"The Russell Group is an association of leading UK research-intensive universities committed to maintaining the highest standards of research, education and knowledge transfer. The members of The Russell Group have the quality and strengths to compete successfully in the global market place for research, skills, expertise and training."

"The aims and objectives of The Russell Group are to promote the interests of universities in which teaching and learning are undertaken within a culture of research excellence, and to identify and disseminate new thinking and ideas about the organisation and management of such institutions."

---

#### *List of member institutions of the Russell Group*

---

Cardiff University  
Imperial College of Science, Technology and Medicine  
King's College London  
London School of Economics and Political Science  
The Queen's University of Belfast  
The University of Manchester  
The University of Birmingham  
The University of Bristol  
The University of Cambridge  
The University of Edinburgh  
The University of Glasgow  
The University of Leeds  
The University of Liverpool  
The University of Newcastle-upon-Tyne  
The University of Nottingham  
The University of Oxford  
The University of Sheffield  
The University of Southampton  
The University of Warwick  
University College London

---

<sup>12</sup> Membership of these groups has changed since the UCAS data used in this research was provided to us (April 2012). For example, the University of Durham, the University of Exeter, Queen Mary and Westfield College and the University of York joined the Russell Group in August 2012. However, analyses were carried out using the groups as in April 2012.

**1994 Group (<http://www.1994group.ac.uk>)**

"The 1994 Group represents nineteen of the UK's most research-intensive and internationally renowned universities. The 1994 Group's mission is to promote excellence in research and teaching. Seeking to promote excellence in the student experience is therefore at the very heart of what we do. Each member institution delivers an extremely high standard of education to its students, demonstrating excellence in teaching and academic support, and providing learning in a research-rich community."

---

***List of member institutions of the 1994 Group***

---

Birkbeck College  
Goldsmiths College  
Loughborough University  
Queen Mary and Westfield College  
Royal Holloway and Bedford New College  
The University of Bath  
The University of East Anglia  
The University of Essex  
The University of Exeter  
The University of Lancaster  
The University of Leicester  
The University of Reading  
The University of St Andrews  
The University of Surrey  
The University of Sussex  
The University of York  
University of Durham

---

**University Alliance (<http://www.university-alliance.ac.uk>)**

"The University Alliance, previously convened informally as the Alliance of Non-Aligned Universities, was formed in 2006 comprising a mixture of pre and post 1992 universities. The member institutions have a balanced portfolio of research, teaching, enterprise and innovation integral to their missions and represent a strong voice from the middle sector making a vital contribution to the prosperity of the country."

---

The Manchester Metropolitan University  
The Nottingham Trent University  
The University of Bradford  
The University of Huddersfield  
The University of Lincoln  
The University of Northumbria at Newcastle  
The University of Plymouth  
The University of Portsmouth  
The University of Salford  
The University of Teesside  
The University of Wales, Newport  
University of Glamorgan  
University of Hertfordshire  
University of Wales Institute, Cardiff  
University of the West of England, Bristol

---

**Million+ (<http://www.millionplus.ac.uk>)**

"We are a university think-tank. This means we work to help solve complex problems in higher education and to ensure that policy reflects the potential of the UK's world-class university system."

"Our member institutions pride themselves on diversity, flexibility and opportunity: each has its own specialities, qualities and principles, but together they provide a network of institutions that truly promote aspiration, excellence and innovation."

---

***List of member institutions of Million+ Group***

---

Anglia Ruskin University  
Bath Spa University  
Birmingham City University

## Appendix C: University acceptances by degree subject area and university mission group (2010/11 application cycle)

Table C1: University acceptances by degree subject area

<i>Degree subject area</i>	<i>Number of candidates</i>	<i>Percent</i>
Architecture, Building and Planning	8956	1.8
Biological Sciences	40227	8.2
Business & Administrative Studies	61484	12.5
Combined Arts	12778	2.6
Combined Sciences	8361	1.7
Combined Social Sciences	5639	1.1
Creative Arts & Design	53258	10.8
Education	17136	3.5
Engineering	26022	5.3
European Languages, Literature & related	4576	0.9
General, other combined & unknown	3972	0.8
History & Philosophical studies	15092	3.1
Law	22768	4.6
Linguistics, Classics & related	12660	2.6
Mass Communications & Documentation	11834	2.4
Mathematics & Computer Science	29265	5.9
Medicine & Dentistry	9067	1.8
Non-European Languages & related	1434	0.3
Physical Sciences	18464	3.8
Sciences combined with social sciences or arts	19797	4.0
Social Studies	40225	8.2
Social sciences combined with arts	11962	2.4
Subjects allied to Medicine	48023	9.8
Technologies	2817	0.6
Veterinary Science, Agriculture & related	6213	1.3
<i>All areas</i>	492030 <sup>13</sup>	

Table C2: University acceptances by university mission group

<i>University group</i>	<i>Number of candidates</i>	<i>Percent</i>
Russell Group	89921	18.4
1994 Group	50123	10.2
University Alliance	110329	22.5
Million +	113538	23.2
Other	128119	25.6

<sup>13</sup> This figure includes candidates from Scotland and overseas.

## Appendix D: Most popular A level subject combinations for degree subject areas

These tables present the ten most popular A level combinations among students enrolled on courses in given subject areas (restricted to students who have taken at least three A levels, excluding General Studies). The ranking and percentage across accepted applicants in all subjects (again restricted to students with at least three A levels, excluding General Studies) is also shown for comparison.

Table D1: Architecture, Building and Planning

<b>Rank</b>	<b>Combination of A level subjects</b>	<b>%</b>	<b>Overall rank</b>	<b>Overall %</b>
1	ART & DESIGN+MATHEMATICS+PHYSICS	6.0	34	0.3
2	ART & DESIGN+DESIGN & TECHNOLOGY+MATHEMATICS	2.4	113	0.1
3	DESIGN & TECHNOLOGY+MATHEMATICS+PHYSICS	2.4	13	0.5
4	ART & DESIGN+GEOGRAPHY+MATHEMATICS	1.9	170	0.1
5	CHEMISTRY+MATHEMATICS+PHYSICS	1.1	2	2.1
6	ART & DESIGN+CHEMISTRY+MATHEMATICS	1.1	293	0.1
7	ART & DESIGN+HISTORY+MATHEMATICS	1.0	357	0.1
8	FURTHER MATHEMATICS+MATHEMATICS+PHYSICS	1.0	6	1.0
9	ART & DESIGN+ECONOMICS+MATHEMATICS	1.0	243	0.1
10	ART & DESIGN+FURTHER MATHEMATICS+MATHEMATICS+PHYSICS	0.9	396	0.0

Table D2: Biological Sciences

<b>Rank</b>	<b>Combination of A level subjects</b>	<b>%</b>	<b>Overall rank</b>	<b>Overall %</b>
1	BIOLOGY+CHEMISTRY+MATHEMATICS	9.2	1	4.7
2	BIOLOGY+CHEMISTRY+PSYCHOLOGY	3.5	4	1.1
3	BIOLOGY+CHEMISTRY+PHYSICS	2.1	7	0.8
4	BIOLOGY+CHEMISTRY+GEOGRAPHY	1.9	8	0.7
