Appendix B: A-level subjects classification ..... 59

## Summary of findings

According to figures from the Office for National Statistics, the UK is more culturally diverse today than ever before. In the 2007 GCSE and A-level cohorts there were students from 95 different ethnic minorities, grouped in 18 different ethnic groups.

Findings relating to the uptake of GCSE subjects by ethnic group
o Chinese pupils were the most likely to achieve five or more GCSE grades $A^{*}$ - $C$ (including English and mathematics). Indian pupils had the next highest levels of attainment. The lowest level of GCSE attainment was among Caribbean pupils.
o Almost all pupils from all ethnic groups were taking GCSEs in English and mathematics. However, pupils with Chinese, Indian and White and Asian backgrounds showed a preference for English literature compared with the other ethnic groups.
o Pupils with a Chinese, Indian, White and Asian or any other Asian background showed a preference for the separate sciences (biology, chemistry and physics), while pupils with Black backgrounds were less likely to take any of these subjects and showed a preference for the single award in science.
o Pupils with Chinese, Indian, White and Asian and any other Asian background were more likely to study a modern foreign language than pupils with any other background. On the contrary, pupils with Pakistani, Bangladeshi, Caribbean and White and Black Caribbean backgrounds were less likely to study a modern foreign language.
o $42 \%$ of Chinese pupils were studying Chinese at GCSE; $27 \%$ of Pakistani pupils were studying Urdu; 23\% of Bangladeshi pupils were studying Bengali; 4\%, 11\% and 5\% of pupils from other ethnic groups were studying a GCSE in Persian, Arabic and Turkish, respectively. These figures support the fact that children from multilingual communities, who are growing up with knowledge of other languages in addition to English, are studying them at school.

## Findings relating to the uptake of A-level subjects by ethnic group

o Uptake figures for A-level subjects in the area of Science/Mathematics for pupils with a Black background (other than African) were low when compared with figures for other ethnic groups. However, figures for subjects in the Arts field were slightly higher.
o Pakistani, Indian, Chinese and Bangladeshi pupils, as well as pupils with other Asian backgrounds showed a preference for subjects in the Science/Mathematics area compared with other ethnic groups. On the other hand, the uptake of subjects in the English and Arts areas by pupils from these groups was generally lower than the uptake by pupils from other ethnic groups.
o The uptake of subjects in the Social Science/Humanities area was less popular among Chinese pupils and those with other Asian background.
o With regard to the uptake of some of the most popular individual A-level subjects, psychology seemed to be more popular among students of Caribbean and other Black backgrounds and less popular among Chinese students. The uptake of history and geography decreased among the minority ethnic groups, being at its lowest in geography for Caribbean pupils and in history for Chinese pupils.
o The three main foreign languages (French, German and Spanish) were not taken by many pupils from the ethnic minority groups. For example, less than $1 \%$ of African, Caribbean, Pakistani and Bangladeshi pupils studied German or Spanish and the uptake figures for French among these groups were also lower than the overall uptake figure. Pupils from a White background, other than White British and Irish, favoured languages more than pupils from any other background.
o The most common combination of at least three A-level subjects, excluding general studies, was biology, chemistry and mathematics for all ethnic groups. However, the percentage of pupils taking this combination ranged from $2 \%$ among the White and Black Caribbean pupils to $16 \%$ among pupils of Asian backgrounds.
o Chinese, Indian, Pakistani and pupils with other Asian background were less likely to take 'less effective preparation' subjects. On the other hand, Caribbean and pupils with a mixed White and Black background were more likely to take those subjects at A-level.

Differences in uptake between ethnic groups might not be attributed entirely to ethnicity. Different ethnic groups have different socio-economic profiles, which can affect the educational choices, and consequently it is not possible to say categorically whether the differences observed are the result of ethnic differences per se or whether socio-economic or other factors play a part. Also, different ethnic groups, because of their geographical location, might go to different types of schools and colleges, which, again, can affect their choices. Even the chance of a student from an ethnic minority background being able to study his first language might be limited by the centre's ability to support the course or its willingness to make the appropriate entries. It is beyond the scope of this study to investigate these additional issues.

It would be very useful to know if students from ethnic minorities are first or subsequent generations. This can be an important factor in subject choice. First generation students might have to take subjects in the Science/Maths area because their knowledge of English does not support subjects in the Social Science/Humanities area (e.g. History). However, after a couple of generations their English improves and they might be able to take a broader range of subjects.

## 1. Scope of the study

According to figures from the Office for National Statistics, the UK is more culturally diverse today than ever before. However, the people from the high variety of non-White backgrounds are not evenly distributed across the country, tending to live in the large urban areas. The different groups share some characteristics but there are often greater differences between the individual ethnic groups than between the minority ethnic population as a whole and the White British people.

In terms of education, there are notable differences in uptake and achievement by ethnic groups. In general, Chinese and Indian pupils perform best whilst children with Caribbean, Pakistani and Bangladeshi backgrounds perform less well.
At A-level, Vidal Rodeiro (2007a) showed that, in comparison with the white group, Black African, Chinese, Mixed, Indian and Pakistani students were more likely to study two or more science subjects.

This statistical report investigates the uptake of GCSE and A-level subjects in England by ethnic group.

It should be borne in mind that the differences in uptake between ethnic groups might not be attributed entirely to ethnicity. Different ethnic groups have different socio-economic profiles, which can affect the educational choices, and consequently it is not possible to say categorically whether the differences observed are the result of ethnic differences per se or whether socio-economic or other factors play a part. It is beyond the scope of this study to investigate these additional issues.

## 2. Data

Data for this report was extracted from the National Pupil Database (NPD). This database is compiled by the Department for Children, Schools and Families. It contains national examination data for all candidates who sat an examination in an academic year.

The PLASC (Pupil Level Annual School Census) data gives detailed information about all the pupils in the English state school system, including personal data, such as ethnicity, first language, special needs and eligibility for school meals. PLASC data for the cohort of students taking GCSE and A-level exams in the academic year 2006/2007 was matched to the examination results.
For the GCSE cohort, ethnicity data was available for $91 \%$ of the students. For the A-level cohort, data was available for $53 \%$ of the students. The amount of missing data was probably due to the fact that only the schools in the state system have to complete the school census and, for example, independent schools and other centres that offer A-level subjects might not have done so.

## 3. Uptake of GCSE subjects by ethnic group

In the 2007 GCSE cohort, there were 95 different ethnic codes, grouped in 18 ethnic groups. Table 1 shows the numbers of students taking GCSE subjects by ethnic group. A list of ethnic codes and the groups they belong to can be found in Appendix A.
Table 1: Distribution of GCSE candidates by ethnic group

| Ethnic Group | Frequency | Percent |
| :--- | :---: | :---: |
| White British | 476055 | 81.58 |
| Pakistani | 14160 | 2.43 |
| Indian | 13185 | 2.26 |
| Any Other White Background | 12665 | 2.17 |
| African | 11103 | 1.90 |
| Caribbean | 8102 | 1.39 |
| Bangladeshi | 5552 | 0.95 |
| White and Black Caribbean | 5381 | 0.92 |
| Any Other Ethnic Group | 5142 | 0.88 |
| Any Other Mixed Background | 4936 | 0.85 |
| Any Other Asian Background | 4740 | 0.81 |
| White and Asian | 2748 | 0.47 |
| Any Other Black Background | 2564 | 0.44 |
| Chinese | 2170 | 0.37 |
| Irish | 2156 | 0.37 |
| White and Black African | 1316 | 0.23 |
| Gypsy / Romany | 278 | 0.05 |
| Traveller Of Irish Heritage | 104 | 0.02 |
| Refused | 5946 | 1.02 |
| Information Not Obtained | 5263 | 0.90 |

Ethnic groups in italics in Table 1 are not considered in the rest of the report.

### 3.1 Percentages of students achieving five or more $A^{*}$-C grades at GCSE

Figure 1 shows that, in 2007, Chinese pupils were the most likely to achieve five or more GCSE grades A $^{*}$-C (including English and mathematics), with $71 \%$ of Chinese girls and $62 \%$ of Chinese boys respectively. Indian pupils had the next highest attainment levels.

The lowest levels of GCSE attainment were among Caribbean pupils, particularly boys. Only $22 \%$ of Caribbean boys and $34 \%$ of Caribbean girls achieved five or more $\mathrm{A}^{*}$-C grades at GCSE. Pupils with other Black and White and Black Caribbean backgrounds had the next lowest levels of attainment.

Within each ethnic group a higher proportion of girls than boys achieved five or more GCSE grades $A^{\star}-C$ (including English and mathematics).

Figure 1: Percentages of students achieving five or more GCSE grades $\mathrm{A}^{*}-\mathrm{C}$ (including English and mathematics) by gender and ethnic group

### 3.2 Uptake of GCSE core subjects: English, Mathematics and Science

In this section, the uptake of the core subjects, English, mathematics and science is considered.
Virtually all pupils should be taking GCSEs in English, mathematics and science ${ }^{1}$.
While pupils with a Chinese, Indian, White and Asian or any other Asian background showed a preference for the separate sciences (biology, chemistry and physics), pupils with Black backgrounds (African, Caribbean, White and Black Caribbean and other Black backgrounds) were less likely to take a GCSE in these three subjects and they seemed to show a preference for the single award in science. The uptake figures for the GCSE double award in science were relatively similar for all the ethnic groups.
There were small differences in the uptake of English literature, with pupils from Chinese, Indian and White and Asian backgrounds showing a preference for this subject compared with the other ethnic groups.

In Vidal Rodeiro (2007b) the uptake of the GCSE core subjects by students' attainment was presented. The report showed that the percentages of medium and high attainment students taking English literature were quite high and the percentages of low and medium attainment students in the three separate sciences were very low. It has always been the case that the uptake of biology, chemistry and physics has been higher for the higher attaining students and percentages of students entered for the single and double award science courses have been lower for the high attaining group compared with the medium and low attaining groups. Therefore, it could be the case that the differences in uptake between the different ethnic groups are not attributed entirely to ethnicity and students' attainment plays a part.

[^0]Table 2: Uptake of GCSE core subjects by ethnic group

| Ethnic Group | GCSE subject |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | English | English Literature | Mathematics | Biology | Chemistry | Physics | Science: <br> Single Award | Science: <br> Double Award |
| African | 95.76 | 81.66 | 98.23 | 5.20 | 4.85 | 4.75 | 14.81 | 66.14 |
| Caribbean | 97.03 | 81.65 | 98.44 | 3.99 | 3.34 | 3.25 | 15.82 | 65.24 |
| Other Black | 96.49 | 80.73 | 98.21 | 4.49 | 3.86 | 3.86 | 15.09 | 64.70 |
| Bangladeshi | 97.03 | 82.89 | 98.60 | 4.70 | 4.45 | 4.30 | 9.78 | 65.69 |
| Chinese | 94.61 | 85.85 | 96.59 | 15.71 | 15.81 | 15.85 | 6.54 | 68.20 |
| Indian | 98.32 | 89.04 | 99.31 | 9.56 | 9.49 | 9.49 | 7.18 | 74.62 |
| Pakistani | 96.99 | 79.70 | 98.43 | 4.41 | 4.29 | 4.24 | 12.53 | 67.15 |
| Other Asian | 95.34 | 82.00 | 97.83 | 9.98 | 9.98 | 9.87 | 9.81 | 67.07 |
| White British | 97.41 | 82.23 | 98.83 | 6.50 | 6.30 | 6.27 | 10.99 | 70.20 |
| Irish | 96.99 | 84.04 | 98.56 | 8.81 | 8.72 | 8.72 | 10.99 | 69.62 |
| Other White | 92.95 | 78.63 | 96.86 | 7.25 | 6.96 | 6.87 | 12.85 | 67.02 |
| White / Asian | 97.27 | 87.41 | 98.58 | 10.77 | 10.52 | 10.59 | 7.79 | 73.03 |
| White / Black African | 98.81 | 82.83 | 97.80 | 8.28 | 7.98 | 7.98 | 12.46 | 67.55 |
| White / Black Caribbean | 96.32 | 80.23 | 98.10 | 4.01 | 3.62 | 3.61 | 14.07 | 67.55 |
| Other Mixed | 96.60 | 83.47 | 98.20 | 7.68 | 7.41 | 7.54 | 10.27 | 69.57 |
| Other Ethnic Group | 93.00 | 78.41 | 96.91 | 6.63 | 6.22 | 6.13 | 13.69 | 65.36 |

| All | 96.40 | 81.32 | 96.40 | 8.42 | 8.05 | 7.99 | 10.85 | 67.74 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

### 3.3 Uptake of Modern Foreign Languages

In Table 3, the uptake of the most common modern foreign languages is presented.

Table 3: Uptake of modern foreign languages by ethnic group

| Ethnic Group | Modern foreign languages |  |  |
| :--- | :---: | :---: | :---: |
|  | French | German | Spanish |
| African | 32.31 | 6.03 | 6.12 |
| Caribbean | 23.53 | 5.95 | 7.23 |
| Other Black | 26.29 | 5.81 | 7.41 |
| Bangladeshi | 17.00 | 4.70 | 4.83 |
| Chinese | 39.54 | 14.93 | 8.57 |
| Indian | 35.21 | 13.39 | 7.99 |
| Pakistani | 17.80 | 6.68 | 4.25 |
| Other Asian | 34.77 | 12.83 | 7.38 |
| White British | 27.44 | 12.18 | 7.21 |
| Irish | 33.35 | 11.27 | 9.00 |
| Other White | 30.28 | 12.83 | 12.00 |
| White / Asian | 35.26 | 13.83 | 10.33 |
| White / Black African | 31.08 | 9.65 | 8.21 |
| White / Black Caribbean | 21.85 | 7.34 | 7.60 |
| Other Mixed | 30.63 | 10.56 | 11.22 |
| Other Ethnic Group | 30.53 | 8.48 | 13.54 |
|  |  |  |  |
| All | 29.67 | 11.84 | 8.41 |

Pupils with Chinese, Indian, White and Asian and any other Asian background were more likely to study a modern foreign language than pupils with any other background. On the contrary, pupils with Pakistani, Bangladeshi, Caribbean and White and Black Caribbean backgrounds were less likely to study a modern foreign language.
It should be borne in mind that some of the children from multilingual communities who are growing up with knowledge of languages such as Urdu, Chinese or Bengali, in addition to English, are studying their languages at school. For example, $42 \%$ of Chinese pupils were studying Chinese at GCSE; 27\% of Pakistani pupils were studying Urdu; 23\% of Bangladeshi pupils were studying Bengali; 4\%, $11 \%$ and $5 \%$ of pupils from other ethnic groups were studying a GCSE in Persian, Arabic and Turkish, respectively. For a more detailed account of the uptake of modern foreign languages at GCSE, focusing on community languages, see Vidal Rodeiro (2009).

### 3.4 Uptake of individual GCSE subjects

Tables 4 to 20 present, in rank order, the individual GCSE subjects with an uptake higher than $1 \%$ by ethnic group and gender. Figures are expressed as a percentage of GCSE students by ethnic group and gender.

Table 4: Uptake of individual GCSE subjects in 2007. All students

| GCSE subject | All | Girls | Boys |
| :--- | :---: | :---: | :---: |
| Mathematics | 96.40 | 96.95 | 95.87 |

## 4. Uptake of A-level subjects by ethnic group

At A-level, differences in subject choices made by different ethnic groups might have their origins in family attitudes towards education and towards what subjects and courses are seen as leading to professional careers. Also, for some A-level subjects, for example the sciences (physics, chemistry and biology), the pool of potential students among some ethnic groups is severely limited by their performance at GCSE.

Previous research in this field (see, for example, Elias et al., 2006) revealed that Indian and Chinese students show a strong preference for science at A-level compared with other ethnic groups. In contrast, Black Caribbean students reveal a strong aversion to science, in particular to chemistry and physics.

In Vidal Rodeiro (2007a) it was shown that in comparison with the White group, African, Chinese, Mixed, Indian and Pakistani students had a higher probability of taking two or more science subjects. In particular, the odds of taking two or more science subjects for a Chinese, Pakistani and Indian student were 6.8, 3.0 and 2.6 times the odds of a White student, respectively. Also, some ethnic minorities such as Indian, Pakistani or Bangladeshi were less likely to take modern foreign languages.
The patterns mentioned above are also present in the tables presented in this report.
In the 2007 A-level cohort, there were 95 different ethnic codes, grouped in 18 ethnic groups. Table 21 shows the numbers of students taking A-level subjects by ethnic group. A list of ethnic codes and the groups they belong to can be found in Appendix A.

Table 21: Distribution of A-level candidates by ethnic group

| Ethnic Group | Frequency | Percent |
| :--- | :---: | :---: |
| White British | 107550 | 78.33 |
| Indian | 5722 | 4.17 |
| Any Other White Background | 4006 | 2.92 |
| Pakistani | 2979 | 2.17 |
| African | 2167 | 1.58 |
| Any Other Asian Background | 1598 | 1.16 |
| Any Other Ethnic Group | 1579 | 1.15 |
| Chinese | 1390 | 1.01 |
| Any Other Mixed Background | 1363 | 0.99 |
| Caribbean | 1110 | 0.81 |
| Bangladeshi | 943 | 0.69 |
| White and Asian | 889 | 0.65 |
| Irish | 735 | 0.54 |

It is worth noting that the number of students that stay on in education from GCSE to A-level varies by ethnic group. However, the exact figures are not available to us and we can only approximate them. For example, using figures from Tables 1 and 21, around $23 \%$ of White British students carried on to study A-levels. This figure was much lower than for Indians (43\%) or Chinese students (64\%) but higher than for Caribbean students (14\%).

### 4.1 Uptake of subject areas at A-level

In this section, the uptake of subject areas at A-level by ethnic group is presented. A-level subjects were grouped into five areas: Science/Mathematics, English, Languages, Social Science/Humanities and Arts. Details of the subject areas can be found in Appendix B. The analysis described in this section was restricted to those candidates with at least three A-level subjects, excluding general studies.

Pakistani, Indian, Chinese and Bangladeshi pupils, as well as pupils with other Asian backgrounds showed a preference for subjects in the Science/Mathematics area compared with other ethnic groups. On the other hand, the uptake of subjects in the English and Arts areas by pupils from these groups was generally lower than the uptake by pupils from other ethnic groups.

The uptake figures for subjects in the Science/Mathematics area for pupils with a Black background (other than African) were low when compared with other ethnic groups. However, the figures for subjects in the Arts field were slightly higher.

The uptake of subjects in the Social Science/Humanities area was less popular among Chinese pupils and those with other Asian backgrounds.
The uptake of subjects in the area of languages was much higher for Chinese pupils than for any other ethnic group with the exception of pupils with other White backgrounds. As for GCSEs, children from multilingual communities might be studying their languages at school.

Table 22: Uptake of subject areas at A-level by ethnic group (\% of students with at least three A-levels, excluding general studies)

| Ethnic Group | Subject Area |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Science <br> Mathematics | English | Social Science <br> Humanities | Arts | Languages |
| African | 58.51 | 32.13 | 69.57 | 19.86 | 8.16 |
| Caribbean | 42.68 | 46.38 | 78.43 | 36.83 | 7.40 |
| Other Black Background | 50.40 | 40.00 | 68.80 | 36.00 | 10.00 |
| Bangladeshi | 62.13 | 29.84 | 74.52 | 19.72 | 4.36 |
| Chinese | 86.05 | 12.46 | 54.01 | 18.10 | 26.01 |
| Indian | 73.72 | 22.94 | 68.52 | 15.09 | 6.44 |
| Pakistani | 68.78 | 28.01 | 69.50 | 11.66 | 6.46 |
| Other Asian Background | 76.30 | 20.87 | 56.41 | 13.62 | 11.41 |
| White British | 48.91 | 41.71 | 74.84 | 35.17 | 9.70 |
| Irish | 43.01 | 47.67 | 82.44 | 28.32 | 9.14 |
| Other White Background | 48.08 | 41.44 | 71.45 | 31.07 | 30.05 |
| White and Asian | 56.38 | 40.43 | 68.12 | 27.54 | 15.94 |
| White and Black African | 41.79 | 41.79 | 75.62 | 33.83 | 12.94 |
| White and Black Caribbean | 43.79 | 47.28 | 77.12 | 42.48 | 10.68 |
| Other Mixed Background | 53.12 | 41.23 | 68.78 | 31.02 | 16.95 |
| Other Ethnic Group | 66.73 | 25.33 | 60.23 | 21.99 | 22.47 |
|  |  |  |  |  |  |
| All | 50.84 | 38.25 | 72.59 | 33.28 | 12.24 |

### 4.2 Uptake of individual A-level subjects

This section presents the uptake of individual A-level subjects by ethnic group. Ethnic Groups in italics in Table 21 are not considered in the remainder of the report.

General studies was the most popular A-level subject only among the White British pupils with almost $30 \%$ of students taking it. This figure compared with the uptake figures for Bangladeshi pupils (7\%) and Caribbean pupils (10\%).

Pakistani, Indian, Chinese and Bangladeshi pupils, as well as pupils with a mixed White and Asian background and those with any other Asian background showed a preference for mathematics and science subjects compared with other ethnic groups. Clear examples of this were the uptake figures for A-level mathematics (Chinese 55\%; Indian 36\%; all students $21 \%$; Caribbean 13\%) or A-level chemistry (Chinese 31\%; Indian 30\%; Pakistani 28\%; all students 12\%; Caribbean 10\%)

Pupils with Black backgrounds showed a preference for English literature compared with other ethnic groups, this subject being the most popular A-level among them (e.g. Caribbean $23 \%$; any other Black background 25\%; White and Black African 23\%; White and Black Caribbean 22\%). English literature uptake figures for pupils from Asian backgrounds were much lower (e.g. Pakistani 15\%; Indian 13\%; Chinese 8\%; any other Asian background 12\%).

Psychology, being the 5th most popular A-level subject overall (16\% of students taking it), seemed to be more popular among students of Caribbean and any other Black background (around 22\%) and less popular among Chinese students (12\%).
The three main modern foreign languages (French, German and Spanish) were not very popular among the majority of the ethnic minorities. For example, less than 1\% of African, Caribbean, Pakistani and Bangladeshi pupils studied German or Spanish and the uptake figures for French among these groups were also lower than the overall uptake figure. Pupils from a White background, other than White British and Irish, favoured languages more than the pupils from any other backgrounds.

History and geography were among the 10 most popular subjects at A-level ( $16 \%$ of students take history and around $11 \%$ take geography). However, the uptake of these subjects, in particular geography, decreased among the minority ethnic pupils, being at its lowest in geography for Caribbean and pupils of other Asian backgrounds (4\%) and in history for Chinese pupils (6\%).
Critical thinking was taken by more Indian, Chinese, White and Asian and other Asian background pupils than by pupils of other ethnic backgrounds.

With regards to the Arts, the subject art \& design at A-level was less popular among Pakistani and Indian pupils compared with other ethnic groups.

More details about the uptake figures in the subjects above and in other A-level subjects are given in Tables 23 to 39. These tables present, in rank order, the A-level subjects taken in 2007 (with an uptake higher than 1\%) by gender and ethnic group. Figures are expressed as percentages of A-level students by ethnic group and gender.

### 4.3 Uptake of combinations of A-level subjects

Tables 40 to 56 show the 10 most popular combinations of three or more A-level subjects (excluding general studies) by ethnic group. Figures are expressed as the percentage of Alevel candidates who took three or more A-levels.

The most common combination of at least three A-level subjects, excluding general studies, was biology, chemistry, and mathematics for all ethnic groups. However, the percentage of pupils taking this combination ranged from $2 \%$ among the White and Black Caribbean pupils to $16 \%$ among pupils of other Asian background.

The second most common combination was chemistry, physics and mathematics for pupils from White British, African, Chinese, White and Asian, any other Asian and any other mixed backgrounds and biology, chemistry and psychology for pupils from Caribbean, Pakistani, Indian and Bangladeshi backgrounds.

### 4.4 Uptake of less effective preparation (LEP) A-level subjects

In this section the number of less effective preparation A-levels by ethnic group is investigated.

The list below (Table 57) details the A-level subjects that, taken together, are considered to provide a 'less effective preparation' for the academic courses offered by the University of Cambridge (http://www.cam.ac.uk/admissions/undergraduate/requirements/). To be a realistic applicant, a student will normally need to offer two traditional academic subjects not on this list. However, these subjects may have relevance to non-academic courses offered by other higher education institutions.
Table 57: Less effective preparation (LEP) A-level subjects

| Accounting | Information and Communication Technology |
| :--- | :--- |
| Art and Design | Leisure Studies |
| Business Studies | Media Studies |
| Communication Studies | Music Technology |
| Dance | Performance Studies |
| Design and Technology | Performing Arts |
| Drama/Theatre Studies | Photography |
| Film Studies | Physical Education |
| Health and Social Care | Sports Studies |
| Home Economics | Travel and Tourism |

The following table shows the number of less effective preparation A-levels by ethnic group. Figures are expressed as the percentage of A-level candidates who took three or more Alevels.

Chinese, Indian, Pakistani and pupils with other Asian background were less likely to take LEP subjects. On the other hand, Caribbean and pupils with a mixed White and Black Caribbean background were more likely to take LEP subjects at A-level (e.g. around 18\% of those pupils took two LEP subjects, and 4\% took three or more).

Table 58: Number of less effective preparation A-levels by ethnic group (\% of candidates with at least three A-levels)

| Ethnic Group | Number of LEP A-level subject |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | 0 | 1 | 2 | $3+$ |
| African | 59.43 | 28.23 | 10.78 | 1.56 |
| Caribbean | 43.91 | 32.82 | 18.95 | 4.31 |

[^0]:    ${ }^{1}$ For the science GCSE, students may take:

    - separate exams in biology, chemistry and physics; or
    - a double award exam (equal to two GCSEs) that covers all three subjects; or
    - a single award exam (equal to one GCSE) that covers all three sciences, but less fully.
