28\textsuperscript{th} February 2013
An introduction to 21\textsuperscript{st} Century skills

• What is meant by this term?

• How are 21\textsuperscript{st} Century skills developed in young people?
The broad argument for 21\textsuperscript{st} Century skills

• Life in a global economy is highly international, multicultural, and inter-connected

• Seismic advances in ICT & in access to it

• Economies of developed countries have shifted from a basis of material goods & services to information & knowledge

• The understanding and skills needed today are different

• Emphasis on \textit{use} of information over possession of facts and figures
What are 21st Century skills?

• No single widely-accepted definition
• Literature contains hundreds of overlapping descriptors of the skills set:
# ATC21S categories of 21st Century skills

|                                                                        | 21st Century literacy  
21st Century science etc. (Subjects must evolve to meet new needs) |
There are multiple approaches to developing 21st Century skills in young people.
Approach 1: Continue with long-standing teaching methods

- Nothing new - current focus is due to deficits in aspects of current education system
- Creative, critical & analytical thinking valued by many philosophers & educators (Socrates to John Dewey)
- Maths, science, & vocational courses can be reconceptualised in terms of problem-solving & critical thinking skills (e.g. ACME, 2011; Rose, 2011)
Bloom et al.’s taxonomy of educational objectives (cognitive domain, 1956)

- **Remember**
  - Critical thinking, p-s & d-m
  - Life & career
  - Citizenship
  - Personal & social responsibility

- **Understand**
  - Information literacy
  - Learning to learn, metacog.
  - Citizenship

- **Apply**
  - Communication
  - Collaboration
  - ICT literacy

- **Analyze**
  - Creativity & innovation

- **Evaluate**
  - Information literacy

- **Create**
  - Creativity & innovation
Approach 2: Develop curricula covering 21st Century skills explicitly

- Critical thinking now a subject in its own right
- Thinking skills and global perspectives courses
- Debate over positioning of ICT in the curriculum:
Approach 3: Adopt a skills-centred pedagogy in schools and colleges

E.g. RSA’s *Opening Minds* framework:

5 competences:

- Citizenship
- Managing information
- Managing situations
- Learning to learn
- Relating to people

Teachers use the competences to develop curricula to suit their own schools, and can use whatever content they like.
Approach 4: 
Nurture 21st C skills through extra-curricular activities

- Community work
- Competitions
- Music
- Duke of Edinburgh’s award
- Sport
- School trips
- Inter-scholastic debates

- Concerns over inequality and inequity
Approach 5: Develop 21\textsuperscript{st} C skills in the workplace

“Workplace apprenticeship is the fundamental principle of vocational training in Germany and is thought to combine the most favourable conditions for developing skills.”

Tremblay and Le Bot (2003, p. 14)
Approach 6: Cultivate 21st C skills through independent research projects
